

TENSIOMIN[®] TM 353

Measurement amplifier with analogue display

This compact and rugged unit is intended for fast, routine short-term measurements.

The handy, battery-operated measurement amplifier combined with our sensors is an economical choice for tension measurement.

- Operation independent of the mains > 120 hours with one battery
- Ten-turn potentiometer for zero point setting
- High-quality, easy reading analogue display with 66mm twin scale
- Additional function: averaging through 2 seconds
- Integrated charge level indicator
- Available with rechargeable cells
- Any of the tension sensors in our line with capacitive measuring cell can be attached

Technical Information	
Measurement ranges	three: 100 - 50 - 20 % of sensor's rated load two: 100 - 30 %
Display	Analogue Meter
Output signal	0 to 1 V
Accessories	Sensor connection cable, 2 m long
Options	Accumulator version with separate charging unit - TM 353 A
Dimensions	158 x 96 x 50 mm (W x H x D)
Weight	0,6 kg
